Notes & Rules

TVN 20 (v1.1)	Fully supports TruVision & UltraView camera range through ONVIF or standard firmware. Third party ONVIF cameras can be supported, depending on the level of ONVIF integration of the connected 3rd party cameras.
TVN 40 (VOS 4.3+)	Fully supports UltraView cameras (VOS driven). PSIA cameras are supported up to 2 megapixel & without motion detection or advanced VCA.
TVR 60 (v4.3)	Supports cameras through standard firmware only (no PSIA/ONVIF). 2nd generation IP & MPX cameras will be supported up to 2 MPX through firmware update of TVR 60.
UltraView Platforms (VOS 4.3+)	Fully supports UltraView cameras (VOS driven). PSIA cameras are supported up to 2 megapixel & without motion detection or advanced VCA.
3rd party ONVIF	TruVision 2nd generation cameras (ONVIF compliant) can be connected to 3rd party ONVIF compatible solutions. Note that the level of compatibility depends on the manufacturer's ONVIF interpretation.
3rd party PSIA	TruVision 2nd generation cameras (PSIA compliant) can be connected to 3rd party PSIA compatible solutions. Note that the level of compatibility depends on the manufacturer's PSIA interpretation.
